

## DFM longline

*DFM Longline was created in 1996 by three of Scandinavia's leading fishing gear suppliers. These shareholders have over 175 years combined experience in the industry, and many decades of specialist knowledge of longlining.*

### DFM swivel gear

DFM 9.2mm swivelled longlines have been developed for fishermen who require the extra strength and durability of 9mm gear.

single stopper system

double stopper system

### Unique stopper system

Complete stainless steel rings are pressed onto the mainline; these do not damage the rope fibers as much as other systems, giving higher breaking strength and longer life. Plus, with this system swivels can be mounted onto 3-strand rope, which is better suited to longlining. 4-strand is available too, if preferred.

### Other features

Specially profiled sleeves that cannot be bent or crushed in normal use; welded swivel eyes for extra strength; all components are stainless steel for long life; ropes are manufactured by DFM shareholders to guarantee best quality.

### DFM gear features:

- single or double stopper mounting
- excellent swivel action
- 3-strand mainline for strength and easy handling
- unique stopper system for improved breaking strength
- super strong profiled sleeve
- welded swivel eyes
- choice of top quality mainlines
- tested and proven at sea

### We carry two types of mainlines with DFM swivel gear:

- **50/50 standard**  
50% Polyester & 50% Polysteel,  
3,200 lb.+ breaking strength
- **Polyester**  
100% Polyester,  
3,800 lb.+ breaking strength

Both types of swivel DFM longline are available with either 42" or 48" spacing in soft, medium, or medium-firm lays depending on your application.

### DFM longline

DFM longline is available in 3 or 4 strand: tarred, clear coated, or color coated.

### Polyform LD series buoys

Low Drag (LD) buoys have less than 20% of the drag of standard round buoys, which means faster, safer pick-ups, and less strain on both the crew and the gear. The patented rib design and unique shape allow the buoy to skip along the surface of the water rather than digging in as standard buoys do.

The LD also dramatically reduces gear loss under the most extreme ice conditions. Of course, LD buoys have all the time-proven Polyform features: one-piece construction, reinforced ribbed ropehold eye, unique vinyl valving system, and the Polyform limited lifetime guarantee.

Part #	model	dimensions	color
